Sign in. Examining the ways in which children express their thoughts, feelings and actively generate meaning through experience and interaction, this fully revised and updated new edition is illustrated throughout by extensive case studies and covers a diverse range of topics, including:

socio-historical and global child development over time and place; the child as meaning-maker and active learner; learning in the context of family, culture, group, society; representing and re-representing the world; understanding roles, identity, race and gender; making sense of science and technology; the implications of neuroscience.

The item may be missing the original packaging such as the original box or bag. Levin Hardcover While studies in neuroscience do not deliver the certainties that are sometimes claimed and there is significant misinformation for commercial reasons, I think the

author's fact-fiction critique is too dismissive, based on the social constructivist suspicion of what is labelled as scientific. Stainton-Rogers, R. Signin. The work of Bruer, Helen Penn and others will be cited.
