In general the factors that determine our choices of theory whether puzzle-solutions or potential paradigm theories are not fixed and neutral but vary and are dependent in particular on the disciplinary matrix within which the scientist is working. Thomas Samuel Kuhn – is one of the most influential philosophers of science of the twentieth century, perhaps the most influential. Criticism and Influence 6.

Bruner is clearly mistaken about. Any replacement paradigm had better solve the majority of those puzzles, or it will not be worth adopting in place of the existing paradigm.

Consequently, though scientific revolutions might be like political revolutions in a number of important respects, this does not mean that scientific revolutions are either irrational or resolved by means of the exercise of power.
