Overexploitation occurs if a water resource is mined or extracted at a rate that exceeds the recharge rate. Portal Category. No, cancel Yes, report it Thanks!

Yes, there is a ritualistic tendency to mark major conferences with new conferences.

A modified Hubbert curve applies to any resource that can be harvested faster than it can be replaced. This boundary is clearly interconnected with the climate change boundaries, since the concentration of carbon dioxide in the atmosphere is also the underlying control variable for the ocean acidification boundary. Check system status. By spring the federal government will identify the areas in which there is a particular need for action to implement the Agenda. I suggest that much of what is puzzling or unsatisfactory in the GSP report flows from a systematic blindness with respect to the need for policy cooperation between states, and with respect to the uses of the concept of resilience.
