This chapter illustrates these three themes and how they are central to recent research findings concerning how many of the building blocks of scientific understanding emerge prior to school. Trends in Cognitive Sciences, 8 Video:NoSQL2.

Overcoming misconceptions via analogical reasoning: Abstract transfer versus explanatory model construction. For example, children using paper strips to represent the height of plants may insist on the strips being colored green like the plant stems and demand that each strip be adorned with a flower Lehrer and Schauble, Baltimore, David. Active debates remain concerning the extent to which children are thinking about living things as a distinct and neatly bounded group. Page 90 Share Cite.
