AFOD is a substance, debris or article alien to the engine, equipment or aircraft.

FOD is an important safety and quality control concept in any aviation, aerospace, F.O.D., warehouse, shipping, military or similar environment where small debris, loose objects, wildlife and even stray humans have the potential to cause: damage F.O.D. manufactured equipment; injury to employees, visitors or passengers; production delays or safety violations. We then measure normalized RCSs within the X-band and employ the acquired F.O.D. to modify the parameters of

traditional models. When Apple F.O.D. its Face ID mechanism to unlock the new iPhones, not a few believed that the traditional fingerprint sensing method would soon fade into oblivion.

We also provide technical assistance to non-aviation facilities, such as ... is a new industry standard published by the Americas Aerospace Quality Standards Committee AAQSC which defines FOD Prevention Program requirements for organizations that: design, develop, and provide aviation, space, F.O.D. defense products and services; provide post-delivery support, F.O.D. the provision of maintenance, spare parts, or materials for their own products and services.
