These results also lead to questioning the nature of the relationship between remittances and growth. The value of this index varies from 0 for very high risk to for very low risk. World Development 38 11 : -

Significant amounts of remittances were sent from 37U. To this end, we introduce an interaction term between remittances and the financial development level or the institutional quality in equation 1. Nyamongo, E. As we explain above, the remittances and the financial development have a complementary effect in boosting the growth of GDP.
