Greenhouse effect - Wikipedia

The greenhouse effect is the process by which radiation from a planet's atmosphere warms the surface. However, the term "greenhouse" was not used to refer to this effect by any of these scientists; the term was introduced by Fourier. At these wavelengths, greenhouse gases that were largely transparent to incoming solar radiation are more absorptive.

Greenhouse effect | Department of the Environment and Energy
2), and argon (Ar), are not greenhouse gases because they contain two atoms of the same element such as N₂.

Hotel Reviews of Khaosan Green House Hotel Bangkok Thailand - Page 1

Since the water is transparent in the visible region, they do not compete with the plants that need it. Alternatively, the water exchanges heat with the greenhouse.
