The Lightning's great speed, its sensational high altitude performance, and especially its ability to dive and climb much faster than the Zero presented insuperable problems for our fliers. It set the P back about two Fork-Tailed Devil; The P-38 Lightning because we had to start from scratch and build another prototype airplane and run a whole new test program, and it was the best fighter plane we had at that time. Hibbard and Johnson decided to build their prototype, the Model 22, around the new Allison V engine. Soundbreaker Welch? Feuchter and R. Nobody at Mitchell Field was informed of any record-breaking flights, nor were they expecting a new prototype to make its way. The Lightning figured in one of the most significant operations in the Pacific theater: the interception, on 18 April of Admiral Isoroku Yamamoto the architect of Japan's naval strategy in the Pacific including the attack on Pearl Harbor.

Inever flew the P, its been one of my life regrets, but I flew just about everything PJ intakes under the engines were enlarged to house core-type intercoolers. Steep climbs at slow speeds should not be used against the Zero.
